

Confederation of Indian Industry

CII Cloud Summit ^{6th edition}

"Cloud 3.0: Intelligent, Secure, Sustainable"

Friday, 5 June 2026 : The LaLiT, New Delhi

www.cii-cloud.com

Programme

1000 - 1100 hrs

Inaugural Session: "Cloud 3.0: Intelligent, Secure, Sustainable"

Cloud 3.0 marks the next evolution of digital infrastructure—where intelligence, security, and sustainability converge to redefine enterprise and governance ecosystems. Powered by AI-driven automation, resilient architectures, and green computing practices, it enables organizations to scale with agility while ensuring data sovereignty, cyber resilience, and environmental responsibility. As India accelerates its digital transformation journey, Cloud 3.0 will serve as the backbone for innovation, competitiveness, and inclusive growth.

1100 hrs

Inaugural Session Concludes

1100 – 1200 hrs

Panel Discussion I: "AI-Native Cloud: From Compute to Cognition"

As cloud infrastructure evolves beyond traditional compute and storage, the emergence of AI-native architectures is redefining the very foundation of digital ecosystems. This session will explore how cloud platforms are being re-engineered to seamlessly integrate artificial intelligence at their core—enabling systems to move from mere data processing to intelligent decision-making. From advanced machine learning pipelines and autonomous operations to real-time analytics and cognitive computing, AI-native cloud is accelerating innovation, enhancing agility, and unlocking new business value. The discussion will also highlight implications for scalability, security, and governance as enterprises transition toward a future where cloud is not just a platform, but a thinking, adaptive digital backbone.

1200 hrs

Close

1200 – 1215 hrs

Tea / Coffee Break

1215 – 1315 hrs

Panel Discussion II: "Multi-Cloud & Hybrid Strategies: The New Enterprise Default"

As enterprises accelerate their digital transformation journeys, multi-cloud and hybrid architectures have emerged as the preferred operating model—offering agility, resilience, and strategic flexibility. Organizations are increasingly distributing workloads across public and private clouds to avoid vendor lock-in, optimize costs, and enhance performance while ensuring compliance with evolving data regulations. This shift enables businesses to innovate faster, scale seamlessly, and maintain business continuity in an increasingly dynamic environment.

The session will explore how enterprises can design and manage robust multi-cloud and hybrid ecosystems, address integration and security challenges, and unlock greater value through intelligent workload orchestration. It will also highlight best practices, emerging technologies, and real-world use cases that are shaping the future of enterprise IT infrastructure.

Programme

1315 – 1415 hrs

Panel Discussion III: "Sovereign Cloud & Data Governance: Building Digital Reliability"

In an era where data is the backbone of economic growth and national security, Sovereign Cloud and robust data governance frameworks are emerging as critical enablers of digital reliability. This session will explore how nations and enterprises can ensure data residency, regulatory compliance, and secure digital infrastructure while fostering innovation. It will highlight the role of trusted cloud ecosystems, resilient architectures, and transparent governance mechanisms in building confidence among citizens, businesses, and governments. As India accelerates its digital transformation journey, establishing reliable, secure, and accountable data systems will be pivotal in shaping a future-ready digital economy.

1415 hrs

Session concludes
